ABOUT

Good afternoon! Glad to see you on my resume page. My name is Maxim, nice to meet you. I am a Javascript developer who is constantly improving and developing my skills and knowledge. I try to write not just code, but the most efficient and readable code. I like to solve complex and non-standard problems. I love traveling, nature and everything connected with it, I am fond of 3-d printing, as well as the development of models of parts and mechanisms, I have been attending English courses for more than a year, I want to communicate fluently in English! :-)

Can I value myself? I'll try! :-)
